

^^
Receiver Slices

- 652J-4 Power Supply.
Provides all switched and continuous voltages to all other GRR-18 slices.
- 599H-3 Test Set.
Routes audio from IF Translators to local control, RF noise source, VOX, anti-VOX circuits.
- 887B-1 Frequency Synthesizer.
Produces all frequencies necessary for mixing. 9.9 MHz, 9.9 KHz, 250 KHz, 256.25 KHz, 243.75 KHz, variable injection.
- 888B-2 Preselector.
RF Translator; converts RF to IF.
- 889A-2 IF Translator, A2, B2.
Converts IF to audio for A2 and B2 sidebands.
- 889B-1 IF Translator, A1, B1.
Converts IF to audio for A1 and B1 sidebands and AM.
